Spentra (Live SaaS project): www.spentra.app

PROFESSIONAL SUMMARY

Product-driven Full-Stack Software Engineer with hands-on experience building and launching real-world SaaS products using React, Next.js, TypeScript, and Node.js. Strong product ownership mindset with end-to-end experience across frontend architecture, backend APIs, payments, analytics, and deployment. Seeking a part-time or contract software engineering role in Australia where impact, learning, and real product delivery matter.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, Tailwind CSS, Shadcn UI

Backend: Node.js, REST APIs, Serverless Functions

Databases: PostgreSQL, MySQL, Firebase

SaaS / Payments: Subscription workflows, analytics dashboards, Stripe-based systems

Tools: Git, GitHub, Vercel, Docker (basic), CI/CD (basic)

HERO PROJECT

Spentra — Founder & Full-Stack Engineer

Live SaaS Product | <https://www.spentra.app>

- Built and launched a production SaaS for subscription tracking and spend analytics
- Architected frontend using Next.js, and TypeScript with focus on performance and UX
- Designed APIs, database schemas, and analytics pipelines using Node.js and PostgreSQL
- Implemented dashboards, onboarding flows, and data-driven insights end-to-end
- Owned the full product lifecycle from concept to deployment and iteration

PROFESSIONAL EXPERIENCE

Full-Stack Developer — Evoqed Digital

Jun 2025 – Nov 2025

- Worked exclusively on Zaylo AI, an AI-driven CRM platform
- Built and optimized frontend interfaces using React, Next.js, and TypeScript
- Integrated APIs and collaborated with product and design teams in an agile setup
- Delivered production features in a fast-paced startup environment

IT Manager / Website Developer — Teams Consult

Dec 2024 – Jun 2025

- Led the complete digital and IT setup including website development, hosting, and internal tools
- Acted as the primary technical owner across systems, workflows, and integrations
- Ensured stable, scalable, and maintainable digital operations

Freelance Web & Software Developer

Jun 2022 – Nov 2024

- Delivered web applications and websites for clients across real estate, e-learning, and service industries
- Built React, Next.js, and WordPress solutions from requirements to deployment
- Worked directly with clients to define scope and deliver business outcomes

EDUCATION

Bachelor of Information Technology (TAFE NSW)

Currently studying in Australia

WORK RIGHTS

- Student visa with part-time work rights
- Available for part-time / contract / flexible roles
